

CELL COFFEE TABLE

MATERIAL / SIZE: LENGTH: 47.25 WIDTH: 23.6 HEIGHT: 14.6 (INCHES)
HANDMADE WOODEN FRAMEWORK - MIRROR POLISHED STAINLESS STEEL - MACASSAR EBONY WOOD

Cell Coffee Table. Both the name and form of this coffee/lounge table is inspired by the structure of the human cell. A combination of soft, rounded lines and hard, shiny steel gives it a techno-organic look. The fine wood, together with its solid form and handmade qualities, creates quiet elegance and luxury. Using a unique cladding process, CELL is created without a single welding joint. We have revoked the timeless design law of "form follows function" in place of a higher value to art's inherent raison-d'etre: evoking feelings. The functional aspect of this table is pure luck. You can place things both in and on it. But please mind where you put that glass of red wine...

Design: Michael Malmberg, I/IDSA
