

LIGHTSPEAKER FLOOR LAMP

A surprising lamp! It is shaped like a loud-speaker, but instead of emitting sound it emits light. The "bass & treble reflectors" in the box are really light reflectors with mirror topped bulbs. And the volume control is a dimmer. The fact is that most of the reflecting light bounces back into the box, making it glow, and doesn't blind the spectator. The design however, has a much more dazzling effect.

Design: Michael Malmberg, I/IDSA

MATERIAL / SIZE:

WHITE OPAL ACRYLIC
ALUMINUM
STAINLESS STEEL
SIZE: 11.8 X 66.7 IN
